# U. S. DEPARTMENT OF AGRICULTURE,

## BUREAU OF ANIMAL INDUSTRY,

A. D. MELVIN, CHIEF OF BUREAU.

### SERVICE AND REGULATORY ANNOUNCEMENTS.

JUNE, 1914.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

## NOTICES REGARDING MEAT INSPECTION.

### RULINGS UNDER NET WEIGHT AND VOLUME REGULATIONS.

Referring to the regulations promulgated under the net weight and volume amendment (see Food Inspection Decision 154, reprinted in Service and Regulatory Announcements for May, 1914, p. 62), the following interpretations of the statement "in package form" are cited in order that the regulations may be uniformly and promptly enforced after September 3, 1914:

Single hams, single sides of bacon, shoulders, dried beef cuts, and similar cuts of meat of irregular size and weight, when wrapped or coated with paper, cloth, or gelatin, are not held to constitute food in package form. This also applies to pork loins wrapped in paper. This does not exempt shipping cases or other containers of these products not marked in conformity with the regulations.

Sausage stuffed in animal casings is not held to constitute food in package form.

Lard, compound, and other rendered fats shipped in wooden boxes are considered as being in package form.

Lithograph labels on metal containers now on hand which do not bear the net weight may be corrected by the application of approved stickers bearing the net weight, the stickers to be attached in such a manner as to adhere to the containers under all circumstances. On future supplies of lithographed containers the net weight should be likewise lithographed.

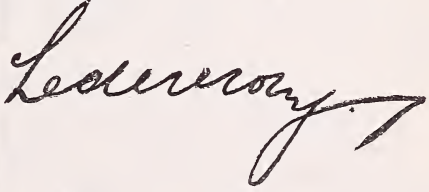

Such statements as "size  $\frac{1}{4}$ ," " $\frac{1}{4}$  cans," etc., will not be permitted to appear on containers. The printing of the quantity of contents upon the outside of packing cases containing a number of units branded in conformity with the law and regulations is not obligatory; however, if given, such statements must be correct and in the form prescribed in the regulations.

#### NEW FORM FOR REPORTING IMPORTED MEATS AND PRODUCTS.

A new report, M. I. Form 109-JJ, has been prepared and a supply forwarded to those stations which report receipts of imported meats and meat food products. This form is to be used for reporting inspections and rejections of imported meats and products, and should be prepared and signed by the employee making such inspections and promptly forwarded to the inspector in charge of the local office.

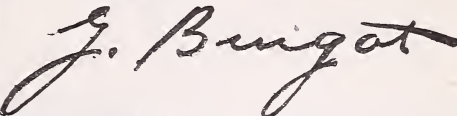

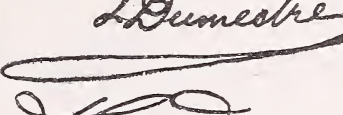

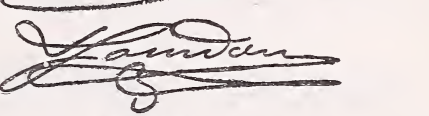

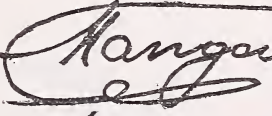

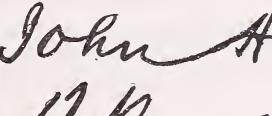

#### SIGNATURES OF FOREIGN MEAT INSPECTORS.

## NEW REGULATIONS.

B. A. I. Order 209, "Regulations for the inspection and quarantine of horses, cattle, sheep, swine, and other animals imported into the United States," superseding B. A. I. Order 180, has been issued, effectively July 1, 1914.

B. A. I. Order 210, "Regulations governing the interstate movement of live stock," superseding B. A. I. Order 143 and amendments, has been issued, effective July 1, 1914.

Copies of both of these orders have been mailed to inspectors in charge. If additional copies are needed they may be obtained upon application to the bureau.

B. A. I. Order 212, "To prevent the spread of scabies in sheep," and B. A. I. Order 213, "To prevent the spread of scabies in cattle," superseding respectively Orders 208 and 197 and amendments, have been signed by the Secretary of Agriculture, effective July 1, 1914. Orders 212 and 213 make no material change in the regulations previously in force, but they are made necessary by the discontinuance of Order 143, to which Orders 208 and 197 made reference. Copies of the new orders have been or will soon be mailed to inspectors in charge.

Attention is also called to Amendment 1 to B. A. I. Order 139, issued May 26, 1914, which amends regulation 4 of Order 139 so as to provide for the tuberculin testing of dairy and breeding cattle for export.

## LIME-AND-SULPHUR DIPS AUTHORIZED FOR OFFICIAL DIPPING OF CATTLE AND SHEEP FOR SCABIES.

The attention of inspectors and other bureau employees is directed to paragraphs 1 and 2, section 9, regulation 3, and paragraphs 1 and 2, section 5, regulation 4, of B. A. I. Order 210, "Regulations governing the interstate movement of live stock," superseding B. A. I. Order 143 as amended, effective July 1, 1914, which provide that at present only lime-and-sulphur dips used in accordance with the regulations will be permitted in the official dipping of cattle and sheep for scabies. The manufacturers of the following-named proprietary lime-and-sulphur dips have been advised that bureau permission for the use of their products will be extended for the present, or until such time as it is found that they are not being prepared in accordance with the statements on which such permission was based. With the list of dips is shown the proper dilution for the dipping of cattle or sheep, as the case may be.

Name of dip.	Gallons of water to 1 gallon of dip.	
	Cattle.	Sheep.
The Adams Lime and Sulphur Dip.....	15	20 $\frac{1}{2}$
The Anchor Brand Lime and Sulphur Dip.....	14 $\frac{1}{2}$	19 $\frac{1}{2}$
Grasselli Lime-Sulphur Solution.....	15	20 $\frac{1}{2}$
Latimer's Lime Sulphur Solution.....	14 $\frac{3}{4}$	20
Lilly's Lime and Sulphur Solution.....	13 $\frac{3}{4}$	18 $\frac{1}{2}$
National Lime and Sulphur Dip.....	5	7
Niagara Lime and Sulphur Solution.....	14	19
Rex Lime and Sulphur Solution Extra A1.....	15	20 $\frac{1}{2}$
Richards' Lime and Sulphur Dip.....	9 $\frac{3}{4}$	13 $\frac{1}{2}$
Sherwin-Williams Lime-Sulphur Solution.....	13	17 $\frac{1}{2}$
Sherwin-Williams No. 15 Cattle Dip.....	15	20 $\frac{1}{2}$

Since the issuance of the foregoing information to inspectors, in the form of circular letter No. 501 of June 22, 1914, permission has been given the manufacturers of "Rex Lime and Sulphur Solution Extra A1" to change the name of this substance to "Rex Lime and Sulphur Solution." However, bureau employees should permit until further notice the use of dip bearing the label "Rex Lime and Sulphur Solution Extra A1" in official dipping, thus giving merchants and dealers throughout the country an opportunity to dispose of stocks of this dip which they now have on hand.

### TEXAS-FEVER QUARANTINE.

#### LIST OF PLACES WHERE SOUTHERN CATTLE MAY BE SHIPPED FOR DIPPING.

Referring to section 8 of regulation 2 of B. A. I. Order 210, "Regulations governing the interstate movement of live stock," effective July 1, 1914, there is given below a list of places outside of the quarantined area where proper dipping facilities are provided to which cattle of the area quarantined on account of splenetic, southern, or Texas fever may be shipped for dipping and subsequent movement for purposes other than immediate slaughter in accordance with the regulations:

*Illinois.*—National Stock Yards, St. Louis National Stock Yards Co.

### ORDERING SUPPLIES.

Some inspectors in charge and other employees located outside of Washington have overlooked the instructions in Service Announcements for October, 1913, page 94, relative to the ordering of supplies. These instructions must be complied with fully, and monthly requisitions should reach the Washington office not later than the 5th of the month. Those received after that date will be classed as emergency requisitions, and unless a satisfactory explanation of the necessity for ordering at a time other than the first of the month is made on the requisition it will be returned, unapproved and unfilled, for proper explanation ON THE REQUISITION (not by letter).

When ordering nonexpendable property at any time the necessity for the same must be explained on the requisition, and if the station is already furnished with a similar article the explanation should indicate whether it is to be in addition to the similar article already on hand or to take the place of same; in the latter case the statement should indicate the condition and the proposed disposal of the article to be discontinued.

Attention is again directed to notice in Service and Regulatory Announcements for May, 1914, page 77, relative to revised Form P-1.

---

### USE OF PERSONAL CONVEYANCES.

According to a recent ruling of the Comptroller of the Treasury, an employee of the Government can not receive compensation for the personal use of his own conveyance in connection with the discharge of official duties unless provision therefor is made in his commission or appointment. Bureau employees who may desire to use their own conveyances for official purposes must obtain permission from the Washington office in advance. Failure to follow this plan will result in the disallowance of all claims for such service.

### PUBLICATIONS IN JUNE.

[The bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to inspectors in charge for distribution to members of their forces. The number of copies varies with the subject or nature of the publication and the number and class of employees. For example, in the case of a publication on a veterinary subject, sufficient copies are sent for the veterinarians. Inspectors in charge will use their judgment and distribute publications to best advantage. Additional copies will be furnished on request so far as possible.]
